Why Should You Participate?

Solarex Istanbul is a unique organization which gathers solar industry professionals all together in Turkey. We invite you to 12th edition of International Solarex Istanbul Fair where the latest technologies are displayed, innovations and application examples are presented.

You shouldn't miss out!

About the Fair

Solarex Istanbul, Turkey's first and unique exhibition on solar energy, provides a huge opportunity to Turkey on the way to being a solar energy center.

Solarex Istanbul will take place on 4-6 April 2019 for the 12th time. It will be a commercial platform to have the latest technologies and combination of new products from all around the world. It takes place annually at Istanbul Expo Center, Turkey. It is also called the most important platform for manufacturers, suppliers and dealers of the solar industry in Eurasia.

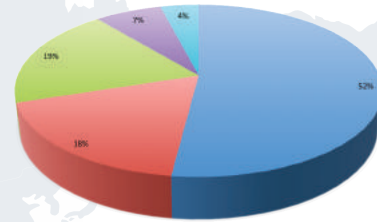

Turkey is known one of the sunniest countries in Europe and it draws so much attention of solar investors. Participants and visitors get to chance to meet leading companies and representatives of alternative energy sources at Solarex Istanbul.

Solarex aims to expose the importance of clean energy to both exhibitors and visitors with numerous activities such as colorful seminars.

The leading organizations of the sector are illuminating the sector with the conferences they will give. The top executives, procurement managers, producers, consumers, national and international representatives of the solar world will be at this exhibition.

In short, all the members of the industry come together once again at the Solarex Istanbul Fair. It is the real commercial platform where the solar energy industry and its followers meet.

Distribution of Visitors

Visitor Profile

Mostly private sector, politics, public institutions, academy and press members, sales and marketing executives, engineers, senior advisers...

In total 20.700 visitors have visited in 2018.

Exhibitor Profiles

Photovoltaic

Cells, modules, inverters, control and testing devices, chargers, batteries, cables, connectors, tracking systems, installation apparatus, building integrated photovoltaic (BIPV), stand-alone systems, solar power plants, energy storage systems, EPC firms, on-grid off-grid systems, solar pumps, regulators, lightening, power suppliers, solar powered consumer products, wafers, material and manufacturing equipment...

Thermal Technologies

Collectors, fittings, absorbers, expansion tanks, degassers, test and control devices, storage tanks, tracking systems, air conditioning, heat treatment, solar thermal plants, material and manufacturing equipment...

Others

Research and development, testing institutes, sectorial press, publishers, education and training, financing organizations, associations, insurance representatives, universities, consultants...

In total 225 companies have participated in 2018.
